

INTERNAL VACANCY

Job title : QC Laboratory Technician
Location: Southampton (Primerdesign)
Closing date : 9th August 2018

Job Summary

Working as a QC Laboratory Technician you will be working within a team responsible for quality control testing of all Primerdesign manufactured products. This role will contribute to the efficient running of our QC team and ensuring a high standard of product manufacture. The role will involve performing QC tests and recording and reporting QC results. This role involves communicating and scheduling QC priorities with the production team and rest of the QC team.

The ideal candidate must be able to work independently, have attention to detail and excellent communication and organisation skills.

Main duties and responsibilities

- Keep accurate laboratory notes and records.
- Help plan and schedule the day to day tests performed by the QC team, ensuring excellent communication with the production team to maintain efficient processing of products.
- QC products and samples according to QC SOPs.
- Work according to our ISO13485 quality system.
- Maintain accurate batch record data and QC reports within our manufacturing systems.
- Perform stability tests, record data and when necessary produce reports.
- Perform production tasks such as labelling and final product packaging.
- Produce any required certificate of analysis or QC data reports.
- Complete manufacturing tasks in the absence of Production Technician.
- Assist with day to day administration tasks.

Qualifications and experience required

- Previous production/laboratory experience would be desirable.

Hours of Work	37.5 hours per week
