

VACANCY

Job title : Quality Control Laboratory Technician

Location: Southampton (Primerdesign)

Closing date : 23rd April 2019

Job Summary

Working as a QC Laboratory Technician you will be working within a team responsible for quality control testing of all Primerdesign manufactured products. This role will contribute to the efficient running of our QC team and ensuring a high standard of product manufacture. The role will involve performing QC tests and recording and reporting QC results. This role involves communicating and scheduling QC priorities with production team and rest of QC team.

The ideal candidate must be able to work independently, have attention to detail and excellent communication and organisation skills.

Main duties and responsibilities

- Keep accurate laboratory notes/records
- Help plan and schedule the day to day tests performed by the QC team, ensuring excellent communication with the production team to maintain efficient processing of products
- QC products & Samples according to QC SOPs
- Working according to our ISO13485 quality system
- Use and maintain relevant laboratory equipment
- Maintain accurate batch record data & QC reports within our manufacturing systems
- Perform stability tests, record data and when necessary produce reports
- Perform production tasks such as labelling and final product packaging
- Produce any required certificate of analysis of QC data reports
- Complete manufacturing tasks in the absence of Production Technician
- Help with day to day administration tasks.

Qualifications and experience required

- Previous production/laboratory experience is essential
- Previous experience of working within a quality system would be desirable
- Ability to work accurately and have an eye for detail

Hours of Work	37.5 hours per week
