Maximising COVID-19 Capacity at Primerdesign

Welcome to our latest blog! There have been many changes since our last blog, worldwide and within the company, our strong commitment to support testing remains. Since our last update, we have heavily expanded our production and manufacturing capacity to ensure we can meet the demand of COVID-19 testing and help support in the fight against this pandemic.

“Our primary focus today is to expand Primerdesign’s manufacturing capacity as quickly as possible to service the continued significant demand for our COVID-19 test."

[embed]https://www.youtube.com/watch?v=9VwVuUY4nPQ[/embed] There have been many positive changes to enable us to be in a position to maximise production capacity, with more than 46 new employees dedicated and as passionate as we are to deliver our vital services globally. We have seen changes to our manufacturing team enabling us to increase the number of raw materials so we can provide more tests on a bigger scale. Each COVID-19 kit contains 76 separate components so our manufacturing team are kept busy! With more employees than ever before we are able to produce more and dispatch far quicker and now able to offer same day dispatch for COVID-19 orders worldwide to keep you 'testing testing testing'. So if you are running low on stock or need tests quickly then please be assured we are here and available to help. Our Customer Care team has doubled in size, so any support you have come day or night, we are in a position to respond quickly and professionally with our expertise on providing you with the help you need to perform your tests. If you would like to order one of our kits please contact our **Customer Care** department who will be happy to help and provide more information on our COVID-19 tests.
