

VersaLab™ Portable

VersaLab

Powered by Primerdesign™

Rapid, lightweight COVID-19 test kit on the go...

VersaLab™ aspires to **support private sector testing of infectious diseases, initially focused on COVID-19.**

The VersaLab™ portfolio now includes VersaLab™ Portable, to provide rapid turnaround polymerase chain reaction (PCR) testing on-site. VersaLab™ Portable aims to broaden access to affordable testing in areas that lack the infrastructure for laboratory-based testing with gold standard PCR results from optimized reagents.
