#### NOTES TO THE INTERIM FINANCIAL STATEMENTS

FOR THE SIX MONTH PERIOD TO 30 JUNE 2022

#### 1. GENERAL INFORMATION AND BASIS OF PREPARATION

The Novacyt Group is an international diagnostics business generating an increasing portfolio of in vitro and molecular diagnostic tests. Its core strengths lie in diagnostics product development, commercialisation, contract design and manufacturing. The Group supplies an extensive range of high-quality assays, reagents and instruments worldwide. The Group directly serves microbiology, haematology and serology markets as do its global partners, which include major corporates. Its registered office is located at 13 Avenue Morane Saulnier, 78140 Vélizy Villacoublay.

The financial information contained in this report comprises the consolidated financial statements of the Group and its subsidiaries (hereinafter referred to collectively as the "Group"). They are prepared and presented in Great British Pounds ("GBP"), rounded to the nearest thousand ("£'000s").

This condensed consolidated interim financial information does not constitute full statutory accounts. It does not include all of the information required for full annual financial statements and should be read in conjunction with the consolidated financial statements for the twelve months ended 31 December 2021. Statutory accounts for the year ended 31 December 2021 were approved by the Board of Directors and have been delivered to the Registrar of Companies. The auditor's report on those accounts was unqualified. The financial information for the half years 30 June 2022 and 30 June 2021 is unaudited and the twelve months to 31 December 2021 is audited.

#### 2. SUMMARY OF ACCOUNTING POLICIES APPLIED BY THE GROUP

The financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRSs"). The financial statements have also been prepared in accordance with IFRSs adopted by the European Union.

The financial information has been prepared on the historical cost basis except in respect of those financial instruments that have been measured at fair value. Historical cost is generally based on the fair value of the consideration given in exchange for the goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in the financial information is determined on such a basis, except for leasing transactions that are within the scope of IFRS 16, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in IAS 2 or value in use in IAS 36.

The areas where assumptions and estimates are material in relation to the financial information are the measurement of goodwill (see note 17 of the 2021 Statutory Accounts for further details), the carrying amounts and useful lives of the other intangible assets (see note 18 of the 2021 Statutory Accounts for further details), deferred taxes (see note 21 of the 2021 Statutory Accounts and note 12 of the 2022 Interim Accounts for further details), trade receivables (see note 23 of the 2021 Statutory Accounts and note 14 of the 2022 Interim Accounts for further details) and provisions for risks and other provisions related to the operating activities (see note 31 of the 2021 Statutory Accounts and note 15 of the 2022 Interim Accounts for further details).

The accounting policies set out below have been applied consistently to all periods presented in the financial information.

The accounting policies applied by the Group in these condensed consolidated interim financial statements are substantially the same as those applied by the Group in its financial statements for the year ended 31 December 2021 and which form the basis of the 2022 financial statements. The methodology for selecting assumptions underpinning the fair value calculations has not changed since 31 December 2021.

#### **Basis of consolidation**

All intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between the members of the Group are eliminated on consolidation. The Group's scope of consolidation included the following companies, all fully consolidated when included in the scope.

# At 30 June 2022 and 31 December 2021

#### At 30 June 2021

Companies	Interest percentage	Consolidation method	Interest percentage	Consolidation method

Legend: FC: Full consolidation

#### Discontinued operations and assets held for sale

A discontinued operation is a component that either has been disposed of, or is classified as held for sale, and

- (a) represents a separate major line of business or geographical area of operations,
- (b) is part of a single co-ordinated plan to dispose of a separate major line of business or geographical area of operations, or
- (c) is a subsidiary acquired exclusively with a view to resale.

Discontinued operations are presented in the consolidated income statement as a single amount comprising the total of:

- The post-tax profit or loss of the discontinued operation,
- The post-tax gain or loss recognised on the measurement to fair value less costs to sell, and
- The post-tax gain or loss recognised on the disposal of assets or the disposal group making up the discontinued operation.

Where material, the analysis of the single amount is presented in the relevant note, (see note 18).

In the statement of cash flows: the net cash flow attributable to the investing and financing activities of discontinued operations have been disclosed separately.

No adjustments have been made in the statement of financial position.

Comparatives for discontinued operations are restated.

#### **Going concern**

The directors have, at the time of approving the financial statements, a reasonable expectation that the Group has adequate resources to continue in operational existence for the foreseeable future. Thus, they adopt the going concern basis of accounting in preparing the financial statements.

The going concern model covers the period up to and including September 2023. In making this assessment, the directors have considered the following elements:

- The working capital requirements of the business;
- A positive cash balance at 30 June 2022 of £99,641,000;
- Full payment of the remaining Long-Term Incentive Plan ("LTIP") that commenced in November 2017 and vested in November 2020;
- Payment of the final earn-out milestone related to the IT-IS International acquisition; and
- Management's expectation of settling the outstanding commercial dispute as per note 20.

If however, Novacyt had to pay the full value of the claim in the period up to and including September 2023, then the Group would not have sufficient funds to settle the liability without agreeing a payment plan or raising additional cash. As a result of this, a material uncertainty exists that may cast significant doubt on the Group's ability as a going concern.

#### Measurement of goodwill

Goodwill is broken down by cash-generating unit ("CGU") or group of CGUs, depending on the level at which goodwill is monitored for management purposes. In accordance with IAS 36, none of the CGUs or groups of CGUs defined by the Group are greater in size than an operating segment.

#### Impairment testing

Goodwill is not amortised, but is subject to impairment testing when there is an indication of loss of value, and at least once a year at the reporting date.

Such testing consists of comparing the carrying amount of an asset to its recoverable amount. The recoverable amount of an asset, a CGU or a group of CGUs is the greater of its fair value less costs to sell and its value in use. Fair value less costs to sell is the amount obtainable from the sale of an asset, a CGU or a group of CGUs in an arm's length transaction between well-informed, willing parties, less the costs of disposal. Value in use is the present value of future cash flows expected to arise from an asset, a CGU or a group of CGUs.

It is not always necessary to determine both the fair value of an asset less costs to sell and its value in use. If either of these amounts exceeds the carrying amount of the asset, the asset is not impaired and it is not necessary to estimate the other amount.

#### **Inventories**

Inventories are carried at the lower of cost and net realisable value. Cost includes materials and supplies, and, where applicable, direct labour costs incurred in transforming them into their current state. It is calculated using the weighted average cost method. The recoverable amount represents the estimated selling price less any marketing, sales and distribution expenses.

The gross value of goods and supplies includes the purchase price and incidental expenses.

A provision for impairment, equal to the difference between the gross value determined in accordance with the above terms and the current market price or the realisable value less any proportional selling costs, is recognised when the gross value is greater than the other stated item.

#### **Trade receivables**

The Group has an established credit policy under which the credit status of each new customer is reviewed before credit is advanced, including external credit evaluations where possible. Credit limits are established for all significant or high-risk customers, which represent the maximum amount permitted to be outstanding without requiring additional approval from the appropriate level of senior management. Outstanding debts are continually monitored by each division. Credit limits are reviewed on a regular basis, and at least annually. Customers that fail to meet the Group's benchmark creditworthiness may only transact with the Group on a prepayment basis.

Trade receivables are recorded initially at fair value and subsequently measured at amortised cost. This generally results in their recognition at nominal value less an allowance for any doubtful debts. Trade receivables in foreign currency are transacted in their local currency and subsequently revalued at the end of each reporting period, with any foreign exchange differences being recognised in the income statement as an income/expense.

The allowance for doubtful debts is recognised based on Management's expectation of losses without regard to whether an impairment trigger happened or not (an "expected credit loss" model). Through implementation of IFRS 9, the Group concluded that no real historical default rate could be determined due to a low level of historical write offs across the business. The Group therefore recognises an allowance for doubtful debts on the basis of invoice ageing. Once an invoice is overdue from its due date, based on agreed credit terms, by more than 90 days, this invoice is then more likely to default than those invoices operating within 90 days of their due date. As such, these invoices will be provided for in full as part of an expected credit loss model, except where Management have reviewed and judged otherwise.

Trade receivables are written off when there is no reasonable expectation of recovery. Indicators that there may be no reasonable expectation of recovery may include the failure of the debtor to engage in a payment plan, and failure to make contractual payments within 365 days of the original due date.

#### Cash and cash equivalents

Cash equivalents are held to meet short-term cash commitments rather than for investment or other purposes. For an investment to qualify as a cash equivalent, it must be readily convertible into a known amount of cash and be subject to an insignificant risk of change in value. Cash and cash equivalents comprise cash funds, current bank accounts and marketable securities (cash Undertakings for Collective Investment in Transferable Securities ("UCITS"), negotiable debt securities, etc...) that can be liquidated

or sold within a very short time (generally with original maturities of three months or less) and which have a negligible risk of change in value. All such items are measured at fair value, with any adjustments recognised in the income statement.

#### **Trade payables**

Trade payables are obligations to provide cash or other financial assets. They are recognised in the statement of financial position when the Group becomes a party to a transaction generating liabilities of this nature. Trade and other payables are recognised in the statement of financial position at fair value on initial recognition, except if settlement is to occur more than 12 months after recognition. In such cases, they are measured using the amortised cost method. The use of the effective interest rate method will result in the recognition of a financial expense in the income statement. Trade and other payables are eliminated from the statement of financial position when the corresponding obligation is discharged.

Trade payables have not been discounted, because the effect of doing so would be immaterial.

#### **Provisions**

In accordance with IAS 37 "Provisions, Contingent Liabilities and Contingent Assets", a provision is recognised when the Group has a current obligation as of the reporting date in respect of a third party and it is probable or certain that there will be an outflow of resources to this third party, without at least equivalent consideration from the said third party. Provisions for risks and charges cover the amount corresponding to the best estimate of the future outflow of resources required to settle the obligation.

The provisions are for the restoration of leased premises, risks related to litigations and product warranties.

#### **Long-Term Incentive Plan**

Novacyt granted shares to certain employees under a LTIP adopted on 1 November 2017. The exercise price was set at the share price on the grant date and the options will be settled in cash. The options fully vested on the third anniversary of the grant date, 1 November 2020. The payment expenses are calculated under IFRS 2 "Share-based Payment". The accounting charge has been spread across the vesting period to reflect the services received and a liability recognised in the statement of financial position.

In December 2021, Novacyt implemented a cash LTIP to qualifying employees, based on achieving certain annual EBITDA targets over a three-year qualifying period. The plan will vest on the third anniversary of the grant date and will be settled in cash.

In February 2022, a Performance Share Awards programme for executive management was created as part of its new LTIP. This LTIP replaced the previous phantom share award scheme which ended in November 2020.

The 2022 Performance Share Awards programme is structured as nil-cost options, giving a right to acquire a specified number of shares at a nil exercise price per share (i.e. for no payment) in accordance with the rules, governed by sections L-225-197-1 and seq. of the French Commercial Code (actions gratuites).

The performance shares will vest after three financial years subject to the Company achieving certain total shareholder return growth conditions. The baseline for total shareholder return is based on the average closing price of the Company's shares in December 2021 which was £3.54. This will be compared to the equivalent figure in December 2024.

#### Consolidated revenue

IFRS 15 "Revenue from Contracts with Customers" establishes a principles-based approach to recognising revenue only when performance obligations are satisfied, and control of the related goods or services is transferred. It addresses items such as the nature, amount, timing and uncertainty of revenue, and cash flows arising from contracts with customers. IFRS 15 replaces IAS 18 "Revenue" and other related requirements. IFRS 15 applies a five-step approach to the timing of revenue recognition and applies to all contracts with customers except those in the scope of other standards:

- Step 1 Identify the contract(s) with a customer
- Step 2 Identify the performance obligations in the contract
- Step 3 Determine the transaction price
- Step 4 Allocate the transaction price to the performance obligations in the contract
- Step 5 Recognise revenue when (or as) the entity satisfies a performance obligation

The Group principally satisfies its performance obligations at a point in time and the amounts of revenue recognised relating to performance obligations satisfied over time are not significant. Therefore, the accounting for revenue under IFRS 15 does not represent a substantive change for recognising revenue from sales to customers.

The Group's revenue recognition processes are generally straightforward, with recognition of revenue at the point of sale and little significant judgement required in determining the timing of transfer of control.

Some contracts with customers contain a limited assurance warranty that is accounted for under IAS 37 (see Provisions accounting policy). If a repair or replacement is not possible under the assurance warranty, a full refund of the product price may be given. The potential refund liability represents variable consideration.

Under IFRS 15.53, the Group can use either:

- The expected value (sum of probability weighted amounts); or
- The most likely amount (generally used when the outcomes are binary).

The method used is not a policy choice. Management use the method that it expects will best predict the amount of consideration based on the terms of the contract. The method is applied consistently throughout the contract. Variable revenue is constrained if appropriate. IFRS 15 requires that revenue is only included to the extent that it is highly probable that there will not be a significant reversal in future periods.

In making this assessment, Management have considered the following factors (which are not exclusive):

- If the amount of consideration is highly susceptible to factors outside the Group's influence;
- Whether the uncertainty about the amount of consideration is not expected to be resolved for a long period of time;

- The Group's experience (or other evidence) with similar types of contract;
- The Group has a practice of either offering a broad range of price concessions or changing the payment terms and conditions of similar contracts in similar circumstances; and
- The contract has a large number and broad range of possible consideration amounts.

The decision as to whether revenue should be constrained is considered to be a significant judgement as the term 'highly probable' is not defined in IFRS 15, Management consider highly probable to be significantly more likely than probable.

#### **Taxation**

Income tax on profit or loss for the period comprises current and deferred tax.

#### Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from net profit as reported in the income statement because it excludes items of income or expense that are taxable or deductible in other years, and it further excludes items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

A provision is recognised for those matters for which the tax determination is uncertain but it is considered probable that there will be a future outflow of funds to a tax authority. The provisions are measured at the best estimate of the amount expected to become payable. The assessment is the result of the Group's judgement based on the advice of external tax professionals and supported by previous experience in respect of such activities.

#### Deferred tax

Deferred tax is the tax expected to be payable or recoverable on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit, and is accounted for using the liability method. Deferred tax liabilities are generally recognised for all taxable temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from the initial recognition of goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

Deferred tax liabilities are recognised for taxable temporary differences arising on investments in subsidiaries and associates, and interests in joint ventures, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilise the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled, or the asset is realised based on tax laws and rates that have been enacted or substantively enacted at the reporting date.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Group intends to settle its current tax assets and liabilities on a net basis.

#### Current tax and deferred tax for the year

Current and deferred tax are recognised in the income statement, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

#### **UK Patent Box regime**

The UK Patent Box regime is a special low corporate tax rate used to incentivise research and development by taxing revenues from patented products differently from other revenues. On 30 March 2022 Novacyt (specifically Primer Design Ltd) received confirmation that the UK Intellectual Property Office had granted the key patent (ORF1a/b), with patent number GB2593010. This means that the effective rate of tax on profits (adjusted for certain rules) derived from the sale of products incorporating this patent is close to 10% rather than the current UK corporation tax rate of 19%.

The effective tax rate is given via a tax deduction and due to the uncertainty over the precise timing of the tax relief available to the company and the complexity involved in making a claim for the first time, a tax asset has not been recognised. The asset will only be recognised when Management can reliably measure and predict the outcome of a Patent Box claim in terms of value and timing.

#### Profit/loss per share

The Group reports basic and diluted profit/loss per ordinary share. Basic profit/loss per share is calculated by dividing the profit/loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the period.

Diluted profit/loss per share is determined by adjusting the profit/loss attributable to ordinary shareholders by the weighted average number of ordinary shares outstanding, taking into account the effects of all potential dilutive ordinary shares, including options.

#### **Exceptional items**

Exceptional items are those costs or incomes that in the view of the Board of Directors, require separate disclosure by virtue of their size or incidence, and are charged or credited in arriving at operating profit on the face of the consolidated income statement.

#### 3. CRITICAL ACCOUNTING JUDGEMENTS AND KEY SOURCES OF ESTIMATE UNCERTAINTY

In the application of the Group's accounting policies, the directors are required to make judgements (other than those involving estimations) that have a significant impact on the amounts recognised and to make estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

#### **Critical accounting judgements**

#### Constraint of revenue

Revenue is only constrained if it is highly probable there will not be a significant reversal of revenue in the future. Highly probable is not defined in IFRS 15 and so it is a significant judgement to be exercised by Management. The value of revenue related to performance obligations fulfilled in 2020 to which constraint has not been applied is £130,642,000.

#### Trade and other receivables

An estimate of the risks of non-receipt based on commercial information, current economic trends and the solvency of individual customers is made to determine the need for impairment on a customer-by-customer basis. Management use significant judgement in determining whether a credit loss provision is required.

At 30 June 2022, the Group had trade receivables of £27,122,000 against which a credit loss provision of £345,000 has been applied. At the date of publishing the interim financial statements, £23,957,000 of the 30 June 2022 receivables were overdue due to the contract dispute with the Department of Health and Social Care "DHSC" (see note 20). Management considers it to be more likely than not that the 30 June

2022 balances are recoverable; this is a significant judgement.

#### Provisions for product warranty

The value of provision required is determined by Management based on available information, experience and, in some cases, expert estimates. Product warranty provisions are only included if it is considered to be probable that an outflow of economic benefit will be required. Determination of probable is a significant judgement especially in light of the dispute described in note 20.

#### Key sources of estimation uncertainty

The Group has a number of key sources of estimation uncertainty. Of these items, only the measurement of goodwill is considered likely to result in a material adjustment. Where there are other areas of estimates these have been deemed not material.

#### Measurement of goodwill

Goodwill is tested for impairment on an annual basis. The recoverable amount of goodwill is determined mainly on the basis of forecasts of future cash flows. The total amount of anticipated cash flows reflects Management's best estimate of the future benefits and liabilities expected for the relevant CGU. The assumptions used and the resulting estimates sometimes cover very long periods, taking into account the technological, commercial and contractual constraints associated with each CGU. These estimates are mainly subject to assumptions in terms of volumes, selling prices and related production costs, and the exchange rates of the currencies in which sales and purchases are denominated. They are also subject to the discount rate used for each CGU.

The value of the goodwill is tested whenever there are indications of impairment and reviewed at each annual closing date or more frequently should this be justified by internal or external events.

#### 4. REVENUE

The table below shows revenue on a geographical basis:

	(Unaudited)	(Unaudited)
	Six month	Six month
	30 June	30 June
Amounts in £'000	2022	2021
Geographical area		
United Kingdom	8,447	21,116
Europe (excluding UK)	2,973	20,367
America	3,514	5,340
Asia-Pacific	1,234	4,359
Africa	202	750
Middle East	138	269
Total revenue	16,508	52,201

Revenue has decreased year on year as a result of COVID-19 sales dropping as the demand for tests has fallen.

The breakdown of revenue by operating segment and geographic area is presented in note 5.

#### 5. OPERATING SEGMENTS

#### **Segment reporting**

Pursuant to IFRS 8, an operating segment is a component of an entity:

- that engages in business activities from which it may earn revenues and incur expenses (including revenues and expenses relating to transactions with other components of the same entity);
- whose operating results are regularly reviewed by the Group's Chief Executive to make decisions regarding the allocation of resources to the segment and to assess its performance; and
- for which discrete financial information is available.

The Group has identified four operating segments, whose performance and resources are monitored separately. Following the Group's announcement to discontinue the Microgen Bioproducts and Lab21 Healthcare businesses earlier this year, the Lab21 Products segment, which is made up of these businesses, is being treated as a discontinued operation:

#### Primer Design

This segment represents the activities of Primer Design Ltd, which is a designer, manufacturer and marketer of molecular 'real-time' qPCR testing devices and reagents in the area of infectious diseases based in Southampton, UK.

#### Lab21 Products

This segment represents the activities of Lab21 Products, which was a developer, manufacturer and distributor of a large range of protein-based infectious disease IVD products covering Microgen Bioproducts Ltd and Lab21 Healthcare Ltd, both based in Camberley, UK. As these businesses ceased trading in June 2022, this segment is being treated as a discontinued operation.

#### IT-IS International

This segment represents the activities of IT-IS International Ltd, a diagnostic instrument development and manufacturing company specialising in the development of PCR devices for the life sciences and food testing industry based in Stokesley, UK.

#### . Corporate

This segment represents Group central/corporate costs. Where appropriate, costs are recharged to individual business units via a management recharge process.

#### . Intercompany eliminations

This column represents intercompany transactions across the Group that have not been allocated to an individual operating segment, but it is not a discreet segment.

The Chief Operating Decision Maker is the Chief Executive Officer.

#### Reliance on major customers and concentration risk

Primer Design's revenue includes approximately £1,272,000 from sales to the Group's largest customer, representing 7.7% of sales in the period (H1 2021: £9,264,000. This was a different customer). No customer contributed 10.0% or more to the Group's revenue in the reporting period.

88.3% of receivables are with one counterparty, with whom there is a contract dispute as disclosed in note 20. Management considers it to be more likely than not that the 30 June 2022 balances are recoverable.

### Breakdown of revenue by operating segment and geographic area

#### At 30 June 2022

Amounts in £'000	Primer Design	IT-IS International	Total
Geographical area			
United Kingdom	8,446	1	8,447
Europe (excluding UK)	2,705	268	2,973
America	3,271	243	3,514
Asia-Pacific	853	381	1,234
Africa	201	1	202
Middle East	138	-	138
Total revenue	15,614	894	16,508

#### 。 At 30 June 2021

Amounts in £'000	Primer Design	r Design IT-IS International	
Geographical area			
United Kingdom	20,899	217	21,116
Europe (excluding UK)	20,201	166	20,367

#### 6 month ended 30 June 2021

Amounts in £'000	Primer Design	Lab21 Products	IT-IS International	Corporate	Intercompany Eliminations	Total
Revenue	50,652	-	7,424	-	-5,875	52,201
Cost of sales	-16,252	-	-3,579	-	4,577	-15,254
Cost of sales - exceptional	-37,192	-	-3,984	-	5,406	-35,770
Sales and marketing costs	-2,814	-	-80	-97	-	-2,991
Research and development	-1,662	-	-213	-	-	-1,875
General and administrative	-6,916	-	-852	-875	-	-8,643
Governmental subsidies	208	-	-	-	-	208
ADJUSTED Earnings before interest, tax, depreciation, amortisation and cost of sales – exceptional, as per management reporting	23,216	-	2,700	-972	-1,298	23,646
Earnings before interest, tax, depreciation and amortisation as per management reporting	-13,976	-	-1,284	-972	4,108	-12,124
Depreciation and amortisation	-620	-	-202	-12	-	-834
Operating (loss)/profit before						
exceptional items	-14,596	-	-1,486	-984	4,108	-12,958

Please note that in accordance with IFRS 5 the results of the Lab21 Products segment for 2021 and 2022 have been reported on a separate line 'Loss from discontinued operations' which is shown below EBITDA and thus all items above EBITDA have a nil value.

#### 6. COST OF SALES

The table below shows the cost of sales:

Amounts in £'000	(Unaudited) Six month 30 June 2022	(Unaudited) Six month 30 June 2021
Cost of inventories recognised as an expense	5,016	5,462
Change in stock provision	3,923	2,618
Non-stock items and supplies	514	167
Freight costs	42	347
Direct labour	2,984	6,817
Other	19	-157
Total cost of sales	12,498	15,254

Total cost of sales has declined year on year reflecting the reduction in sales. In H1 2022 the stock provision relating to continuing operations has increased by a net £3,923,000, based on lower future forecasted COVID-19 sales, to cover excess, short and out of shelf-life finished goods and raw materials. The movement in the stock provision includes a significant release for stock that has been written off in the period.

Direct labour has decreased year on year as a result of scaling back production to align to lower sales.

#### 7. COST OF SALES - EXCEPTIONAL

The table below shows the cost of sales - exceptional:

Amounts in £'000	(Unaudited) Six month 30 June 2022	(Unaudited) Six month 30 June 2021
Cost of inventories recognised as an expense	_	4,802
Change in stock provision	-	26,098
Direct labour	-	4,133
Other	-	737
Total cost of sales - exceptional	-	35,770

Due to the DHSC dispute mentioned in note 20, Management booked a number of one-off, non-recurring cost of sales charges in H1 2021. Two of the key items were a £26,098,000 stock provision, as a result of the Group buying stock to fulfil expected future DHSC orders that did not materialise, and the expensing of £6,884,000 of stock delivered to the DHSC which has not been paid for as it is now included in the ongoing contract dispute.

There were no costs classified as cost of sales - exceptional relating to the DHSC dispute in H1 2022.

#### 8. OTHER OPERATING INCOME AND EXPENSES

Amounts in £'000	(Unaudited) Six month 30 June 2022	(Unaudited) Six month 30 June 2021
Other	2	
		<del></del>
Total other operating income	2	<u> </u>
DHSC contract dispute costs Other	-462 -73	- -
Total other operating expenses	-535	

Costs totalling £293,000 relating to the DHSC contract dispute were shown in 'General and administrative expenses' in the 2021 interim accounts. These costs were reclassified to 'Other operating expenses' in the year end 2021 accounts.

At June 2022 costs relating to the DHSC dispute amounted to £462,000.

#### 9. FINANCIAL INCOME AND EXPENSE

The table below shows financial income and expense:

Amounts in £'000	(Unaudited) Six month 30 June 2022	(Unaudited) Six month 30 June 2021
Financial foreign exchange gains	2,001	185
Interest received	134	16
Other financial income	216	141
Total financial income	2,351	342
Total manetal meetine	2,331	
Interest on IFRS 16 liabilities	-24	-36
Financial foreign exchange losses	-594	-1,596
Other financial expense	-105	-131
Total financial expense	-723	-1,763

#### Financial foreign exchange gains and losses

Financial foreign exchange gains and losses in both periods are driven by revaluations of the LTIP liability and bank and intercompany accounts held in foreign currencies.

#### **10.TAXATION**

The standard rate of corporation tax applied to reported profit is 19%, which is the tax rate applicable to the companies in the United Kingdom for the financial year 2022. It was 19% for the year 2021.

Taxation for other jurisdictions (mainly France) is calculated at the rates prevailing in the respective jurisdictions.

The Group's tax is the sum of the total current and deferred tax.

Amounts in £'000	(Unaudited) Six month 30 June 2022	(Unaudited) Six month 30 June 2021
Current tax income		
Current year tax income	-	3,030
Deferred tax income/(expense)		
Deferred tax income/(expense)	2,041	-735
Total taxation income in the income statement	2,041	2,295

The income for the period can be reconciled to the loss before tax as follows:

Amounts in £'000	(Unaudited) Six month 30 June 2022	(Unaudited) Six month 30 June 2021
Loss before tax from continuing operations	-7,084	-14,379
Tax at the UK corporation tax rate (2022: 19%, 2021: 19%)  Effect of different tax rates of subsidiaries operating in other jurisdictions  Effect of difference in tax rate applied to deferred tax  Effect of non-deductible expenses and non-taxable income  Change in unrecognised deferred tax assets  Other adjustments	1,346 61 888 -254 -	2,732 149 - -39 -524 -23
Total taxation income for the period	2,041	2,295

The UK Government announced in its emergency budget on 23 September 2022 that the planned increase in corporation tax from 19% to 25% in April 2023 will not go ahead. The effect of these changes on the deferred tax balances will be reflected when this legislation is substantially enacted.

#### **11.LOSS PER SHARE**

The loss per share is calculated based on the weighted average number of shares outstanding during the period. The diluted loss per share is calculated based on the weighted average number of shares outstanding and the number of shares issuable as a result of the conversion of dilutive financial instruments. At 30 June 2022, there are no outstanding dilutive instruments.

Amounts in £'000	(Unaudited) Six month 30 June 2022	(Unaudited) Six month 30 June 2021
Net loss attributable to owners of the Company	-8,699	-12,675
Weighted average number of shares	70,626,248	70,626,248
Loss per share (£)	-0.12	-0.18
Diluted loss per share (£)	-0.12	-0.18
Loss per share from continuing operations (£)	-0.07	-0.17
Diluted loss per share from continuing operations (£)	-0.07	-0.17
Loss per share from discontinued operations (£)	-0.05	-0.01
Diluted loss per share from discontinued operations (£)	-0.05	-0.01

#### 12.DEFERRED TAX ASSETS AND LIABILITIES

The table below shows the movements in deferred tax assets and liabilities during the reporting period:

Amounts in £'000	Accelerated capital allowances	Intangible assets	Intra-Group profit	Long-term incentive plan	Tax losses	Other temporary differences	Total
Amounts in E 000	unowunces	ussets	pront	piun	14X 1035C3	differences	Total
At 1 January 2020	-238	-489	897	2,125	_	-73	2,222
(Charge)/credit to income statement	-542	47	-569	-	657	104	-303
At 31 December 2021	-780	-442	328	2,125	657	31	1,919
(Charge)/credit to income statement	-41	23	-59	-1,220	2,931	-2	1,632
At 30 June 2022	-821	-419	269	905	3,588	29	3,551

At 30 June 2022, deferred tax liabilities amounting to £821,000 (December 2021: £780,000) reflect the tax advantage from investments in fixed assets, that is obtained in advance of the depreciation in future financial years.

At 30 June 2022, deferred tax liabilities amounting to £419,000 (December 2021: £442,000) result from the recognition of brand and customer relationships intangible assets as part of the October 2020 IT-IS International acquisition.

At 30 June 2022, deferred tax assets amounting to £269,000 (December 2021: £328,000) result from the elimination of the internal margin on intercompany stock, provisions or assets held.

At 30 June 2022, deferred tax assets amounting to £905,000 (December 2021: £2,125,000) relates to the unpaid portion of the LTIP charge that was recognised by Novacyt UK Holdings in 2020, but will not be deducted for taxation until payments are made in 2022.

Carry forward tax losses total £3,588,000 at 30 June 2022, and have increased from December 2021 as a result of significant losses in H1 2022.

Deferred tax assets and liabilities are recognised on the statement of financial position as follows:

Amounts in £'000	(Unaudited) Six month 30 June 2022	(Audited) Year ended 31 December 2021
Deferred tax assets Deferred tax liabilities	4,796 -1,245	3,143 -1,224
Net deferred tax assets	3,551	1,919

#### 13.INVENTORIES AND WORK IN PROGRESS

The table below shows inventories and work in progress:

Amounts in £'000	(Unaudited) Six month 30 June 2022	(Audited) Year ended 31 December 2021
Raw materials	16,670	19,382
Work in progress	5,338	3,350
Finished goods	5,395	7,831
Stock provisions	-23,148	-19,102
Total inventories and work in progress	4,255	11,461

Total inventories and work in progress has reduced significantly since December 2021, predominantly driven by a large one-off stock provision in H1 2022 related to lower future forecasted COVID-19 sales. Furthermore, a substantial amount of expired or excess stock, of which a significant amount had been provided for, has been disposed of in H1 2022, resulting in a £4,046,000 net movement in the Group stock provision. The Group will continue to look for ways to use inventory that has been provided for.

#### 14.TRADE AND OTHER RECEIVABLES

The table below shows trade and other receivables:

Amounts in £'000	(Unaudited) Six month 30 June 2022	(Audited) Year ended 31 December 2021
Trade and other receivables	27,122	30,279
Expected credit loss provision	-345	-89
Tax receivables – Value Added Tax	8,449	8,213
Receivables on sale of businesses	66	66
Other receivables	1	30
Total trade and other receivables	35,293	38,499

Trade receivables have declined since the year end in line with falling monthly sales.

The trade receivables balance includes a £23,957,000 unpaid DHSC invoice raised in December 2020, in respect of products delivered during 2020, that remains unpaid at the date of publishing the interim accounts. Recovery of the invoice is dependent on the outcome of the contract dispute.

During H1 2021, £49,034,000 (including VAT) of products and services were delivered and invoiced to the DHSC which has now been included as part of the ongoing dispute. As these sales have not been recognised in accordance with IFRS 15, the revenue, trade receivable and VAT element of the transactions have been reversed. This accounting treatment does not change the Group's legal position or rights in relation to the dispute with the DHSC.

The 'Tax receivables – Value Added Tax' balance of £8,449,000 mainly relates to VAT paid in the UK on sales invoices in dispute with the DHSC. As these sales have not been recognised in accordance with IFRS 15, the revenue, trade receivable and VAT element of the transactions have been reversed, resulting in a VAT debtor balance.

Trade receivables balances are due within one year. Once an invoice is more than 90 days overdue, it is deemed more likely to default and as such, these invoices have been provided for in full as part of an expected credit loss model, except where Management have reviewed and judged otherwise.

#### **15.PROVISIONS**

The table below shows the nature of and changes in provisions for risks and charges for the period from 1 January 2022 to 30 June 2022:

Amounts in £'000	(Audited) At 31 December 2021	Increase	(Unaudited) At 30 June 2022
Provisions for restoration of premises	308	117	425
Provisions long-term	308	117	425
Provision for litigation	157	-	157
Provisions for product warranty	19,799	6	19,805
Provisions short-term	19,956	6	19,962

Provisions for product warranty predominantly relates to the ongoing contract dispute with the DHSC as detailed in note 20. Management have assessed the DHSC product warranty provision held at 31 December 2021 and have deemed that it is still appropriate at 30 June 2022.

#### **16.TRADE AND OTHER LIABILITIES**

Amounts in Cloop	(Unaudited) Six month 30 June 2022	(Audited) Year ended 31 December 2021
Amounts in £'000	2022	
Trade payables	914	1,363
Accrued invoices	2,015	3,534
Social security liabilities	1,454	954
Tax liabilities - Value Added Tax	121	115
Other liabilities	3,624	11,224
Total trade and other liabilities	8,128	17,190

Trade payables and accrued invoices have decreased in line with reduced sales.

Other liabilities has fallen as a result of payments being made in relation to the 2017 to 2020 LTIP scheme, leaving the final tranche, which is forecast to be paid by the end of 2022.

#### **17.SHARE CAPITAL**

(Audited) At 31 December 2021	Amount of share capital in £'000	Amount of share capital in €'000	Unit value per share in €	Number of shares issued 70,626,248
(Unaudited) At 30 June 2022	4,053	4,708	0.07	70,626,248

As of 31 December 2021, the Company's share capital of €4,708,416.54 was divided into 70,626,248 shares with a par value of 1/15th of a Euro each.

As of 30 June 2022, the Company's share capital of €4,708,416.54 was divided into 70,626,248 shares with a par value of 1/15th of a Euro each.

The Company's share capital consists of one class of share. All outstanding shares have been subscribed, called and paid.

#### **18.DISCONTINUED OPERATIONS**

In early 2022, Novacyt commenced a strategic review of the business, which included a review of the Microgen Bioproducts and Lab21 Healthcare businesses to consider the merits of maintaining multiple company entities/names under the Novacyt Group umbrella versus a simplified business model and brand, which the directors believed could be more impactful. In April 2022, Novacyt announced its intention to discontinue both businesses, and as at the end of June 2022 they had ceased day to day trading operations.

In accordance with IFRS 5, the net result of the Lab21 Products business has been reported in the line 'Loss from discontinued operations' on the consolidated income statement.

The table below presents the detail of the loss generated by these two businesses as of 30 June 2021 and 2022:

	(Unaudited) Six month	(Unaudited) Six month
	30 June	30 June
Amounts in £'000	2022	2021
Discontinued Operations		
Revenue	1,349	1,749
Cost of sales	-979	-652

Income taxes received/(paid)	4,244	-29,447
Finance (income)/costs	-55	90
Net cash used in operating activities	-1,662	-12,179

#### (\*) The variation of the inventories value results from the following movements:

	(Unaudited)	(Unaudited)
	Six month	Six month
	30 June	30 June
Amounts in £'000	2022	2021
Decrease/(increase) in the gross value of inventory	3,218	-13,615
Increase in the stock provision	4,046	28,375
Total variation of the net value of inventories	7,264	14,760

The details for the increase in the stock provision are covered in notes 6, 7 and 13.

#### **20.CONTINGENT LIABILITIES**

During 2021, the Group received notification of a contract dispute between its subsidiary, Primer Design Ltd, and the DHSC related to revenue totalling £129,125,000 in respect of performance obligations satisfied during the financial year to 31 December 2020.

During 2021, a further £49,034,000 (including VAT) of products and services were delivered and invoiced to the DHSC which have subsequently been included as part of the ongoing dispute. Management made the judgement that in accordance with IFRS 15, Revenue from Contracts with Customers, it was not appropriate at that stage in the dispute to recognise as revenue, any sales invoices raised to the customer in 2021 that were in dispute. However, Management remains committed to obtaining payment for these goods and services.

Payment for £23,957,000 of invoices in respect of products delivered during 2020 remains outstanding at the date of publishing the interim accounts and recovery of the debt is dependent on the outcome of the dispute.

On 25 April 2022, legal proceedings were issued by the DHSC to the Group for amounts paid to Novacyt totalling £134,635,000 (including VAT). This refers to £132,814,000 (including VAT) of reagent sales out of a total disputed amount of £154,950,000 (£129,125,000 excluding VAT as previously reported) plus £1,821,000 (£1,517,000 excluding VAT) of q16 instruments which have been added to the dispute. This takes the total 2020 revenue in dispute to £130,642,000.

On 15 June 2022, Novacyt filed a defence of the claim received on 25 April 2022, and made a counterclaim of £81,500,000 including interest against the DHSC.

The Group continues to believe it has strong grounds to defend the claim and assert its contractual rights, including recovering outstanding sums due from the DHSC under the counterclaim.

Management have reviewed the position at 30 June 2022 and deem this to be an appropriate reflection of the current commercial dispute.

Management and the Board of Directors have reviewed the product warranty provision totalling £19,753,000 booked in 2020 in relation to the DHSC dispute and have deemed that it remains appropriate at 30 June 2022.

#### **21.SUBSEQUENT EVENTS**

No significant events have taken place since the reporting date.
